EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please substitute the Abstract with the following on a separate sheet:

The new abstract is entered in order to bring the Abstract in conformity with the rules.

The following is an examiner's statement of reasons for allowance:

A search of the prior art failed to uncover a reference that provides a reason to combine the distillation and membrane separation steps of the instant invention. For example, US 4638084 and Publication No. 2005/0288471 are the closest prior art. However, these disclosures fail to provide a reason to combine the distillation and membrane separation steps of the instant invention.

With regard to any double patenting issues with copending 10/561613, the examiner notes that the instant application was filed earlier and any double patenting rejection would be the sole issue in the case, see MPEP 804 ("The "provisional" double patenting rejection should continue to be made by the examiner in each application as long as there are conflicting claims in more than one application unless that

"provisional" double patenting rejection is the only rejection remaining in at least one of the applications.").

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
